

Photography record sheet

Completed example

Example values, not measurements from a session by the author or prescribed distances.
Measure your own setup and adjust the distance until the lash detail is sharp.

Session code / purpose

EXAMPLE-01 / documenting the work

Device, app and version

iPhone 15; Apple Camera; iOS 18 (tutorial reference)

Mode / camera

Photo; rear camera at 1x; no filter; flash off

Light: source, position and settings

One diffused panel; above and to the left of the phone; no mixed lighting.

Recorded distances and measurement points

Phone: 35 cm from lens to lash plane. Light: 60 cm from diffuser to face.

Focus, exposure and pose

Focus on the lash line; AE/AF locked for the same view. Reset after each change of pose.

Views taken / file names

Frontal open and closed; right and left sides; detail. Code-phase-view.

Adjustments applied / software

No changes to the treatment result; consistent crop only. Originals retained.

Check and decision for the next series

Inspect tips and corners in the magnified file; retake blurred images before dismantling the setup.

Photography record sheet

Your setup - fillable and printable template

Enter the actual details of your phone and setup. Use a code, not the client's name.

Record changes; keep originals, copies and permissions separately.
